

I have been informed by the State of Wisconsin that special interests are attempting to have a state "No-call" list law changed. My wife and I were real happy when the list was finally inacted after what seemed like a terribly long time. We DO NOT want to be called or solicited by any company. We are asking that the federal government stay out of the state's business on this issue. The state of Wisconsin has enacted a better law, in my opinion, than the federal one, and it should be left alone.
